## Questions

Question 1: Did the group deliver the code and documentation?

☐ Yes

☐ No

Question 2: Could you understand the purpose of the code after reading the documentation?

☐ Yes, everything was clear.

☐ The general idea was clear, but some details were unclear.

☐ The purpose was mentioned but remained unclear.

☐ The purpose of the code was not mentioned at all.

Question 3: Were you able to run the code after reading the documentation?

☐ Yes, we could run the code without problems on the first try.

☐ We were able to run the code after a few trial and errors.

☐ To run the code, we had to contact the group that created the code and perform some steps not mentioned in the documentation.

☐ We were unable to run the code even after contacting the group that created the code.

Question 4: Did you understand what kind of output/result to expect from the code?

- ☐ Yes, after reading the documentation we understood what kind of output/result to expect.
- ☐ After reading the documentation we had a vague idea what kind of output/result to expect.
- ☐ The documentation mentioned what kind of output/result it produces but we were not able to understand it.
- ☐ The documentation did not mention what kind of output/result it would produce.

Question 5: Did the code produce correct output/results?

- ☐ Yes, based on our understanding of the expected output/result, the code produced a correct output/result.
- ☐ The output/result only partly aligned with our expectations.
- ☐ The output/result differed vastly from our expectations.
- ☐ We were not able to produce any output/result from the code.
